EDUCATION

Arab International University — 2021 - 2025

BS in Informatics Engineering (AI)

Relevant Coursework: ML, Deep Learning, Computer Vision, DB Systems.

GPA: 3.06/4.0

Syrian Virtual University — 2026 - Present

Master of Web Science and Artificial Intelligence (MWS)

Syrian Virtual University — 2021 - Present

Information Technology Engineering (ITE)
Specialization: Data Science

Concurrent studies, currently in the fourth year of a five-year program.

University of the People — 2023 - Present

BS in Business Administration

Concurrent studies to develop comprehensive business acumen.

TECHNICAL SKILLS

LANGUAGES

Python, JavaScript, TypeScript, SQL, C++, Java, C#

AI & GENAI

TensorFlow, Keras, Scikit-learn, Generative AI, LLMs, RAG, Multi-Agent Systems, NLP, Computer Vision, Hugging Face Transformers, Recommender Systems

WEB

Next.js, React, FastAPI, Flask, Tailwind CSS

TOOLS & MLOPS

Docker, Git, GitHub Actions (CI/CD), Vector Databases (ChromaDB), REST APIs, n8n, apify, AutoGen, Supabase

LANGUAGES

Arabic	Native
English	Professional

CERTIFICATIONS

Meta Front-End Dev
Coursera (6/9 Courses Completed)

Cert. in Marketing
UoPeople | Apr 2025

Front-End Track
1M Arab Coders & Udacity | 2020

PROFILE

AI Engineer specializing in multi-agent systems and AI-driven automation, with experience building marketing intelligence platforms and recommendation engines processing 300k+ listings. Designed chatbot architectures and GEO evaluation tools. Currently pursuing a Master's in Web Science & AI.

PROFESSIONAL EXPERIENCE

AI Engineer — Feb 2026 - Present

beno.com (UAE - Remote)

- Co-designed a WhatsApp chatbot platform architecture, translating user stories into scalable conversation workflows serving multiple business clients.
- Engineered tool-augmented reasoning for an AI marketing platform, enabling agents to autonomously analyze external signals and generate data-driven campaign strategies.
- Co-developed a GEO assessment platform scoring website content across structured frameworks using LLM-based evaluation, improving SEO audit turnaround.

AI Engineering Intern — Sep 2025 - Jan 2026

beno.com (UAE - Remote)

Automated Lead Generation Pipeline (n8n & Python)

Role: Automation Engineer Intern | Stack: n8n, Python, Reddit/X API, Hub-and-Spoke

- **Hub-and-Spoke Architecture:** Designed a platform-agnostic system enabling "plug-and-play" integration of new social sources without modifying core logic.
- **Modular API Development:** Built robust adapters for social media APIs (e.g., Reddit, X) to automate lead capture and user interaction.
- **State Management:** Orchestrated complex workflows to synchronize distributed data, ensuring zero data loss and high integrity.

Multi-Agent Marketing System (AutoGen & Python)

Role: AI Agent Developer | Stack: Python, AutoGen, Gemini, Planner/Renderer

- **End-to-End Automation:** Engineered an autonomous AI system handling the full marketing lifecycle, from strategic planning to final asset production.
- **Agent Orchestration:** Architected a multi-agent environment where specialized agents independently debate strategy and execute cross-functional tasks.
- **Planner/Renderer Pattern:** Implemented a decoupled architecture separating strategic logic from execution to optimize high-fidelity asset generation.
- **LLM Integration:** Integrated advanced LLMs to drive autonomous agent reasoning for complex market research and content creation.

ACADEMIC & PERSONAL PROJECTS

TrustAsset: AI-Powered Real Estate & Vehicle Marketplace — Feb 2025 - June 2025

AI Developer (RecSys) | Code: Property RecSys • Vehicle RecSys

Core AI Engineering: Engineered recommendation engines for a dual-vertical marketplace, solving "cold start" and data sparsity using Deep Learning and Hybrid Filtering.

- **Deep Learning Property RecSys:** Trained a Deep Learning Autoencoder on 300k+ listings to generate "Property DNA" embeddings for visual similarity recommendations.
- **Hybrid Vehicle RecSys:** Combined k-NN with content-based filtering to mitigate data sparsity, ensuring accurate suggestions with limited interaction data.
- **High-Performance API:** Built a low-latency FastAPI backend with similarity caching to provide instant recommendations for new users.

SQLMentor: AI-Powered SQL Learning Platform — Oct 2024 - Feb 2025

Junior Project | Code: GitHub Repository

- Led front-end development using Next.js to build a responsive UI for AI-driven education.
- Designed core learning pages and gamified profiles to simplify complex SQL concepts and drive engagement.
